CAB302 Dream Team Final Presentation Notes:

Name	Role
Jason	Project Overview
Ton	Project Planning and Design
Thomas	Technical Details
Ahkil	Project Quality
Evan	Teamwork

WHO HOLDS THE CLICKER? Someone has to manage the slides while presenting.

Structure/ Template:
1. Project Overview
    a. What it is, what it does, what it looks like
        i. Fitness Tracker for Weightlifters, Enables the user to log their workouts, compare their fitness & health metrics at different dates, Create & use templates, Be informed of Exercises and their muscle groups, description and alternative exercises. This app looks GREAT.
    b. Include screenshots
    c. List of key features as bullet points
        i. Workout Logging
        ii. Templates
        iii. Exercise Information and Alternatives
        iv. Fitness and Health Metrics
        v. Account - Register Login
2. Project Planning and Design
    a. Describe the planning process:
        i. How did you decide what to do?
            1. We discussed this through discord and group meetings
        ii. Did the plan work through the semester?
        iii. What adaptions did you have to make?
    b. Include examples of requirements, user stories, other planning artifacts
        i. Include fidelity prototype
        ii. Include data schema diagram
3. Technical Details
    a. Present in more details the technologies used in the system, motivate your technical decisions, list and comment of the support software/libraries you needed to use (if any)
    b. You should include a visual representation of the main component, and how they interrelate
4. Project Quality

        a. Detail your approach to ensuring project quality
            i. Agile practices adopted
                1. Mention meetings, discussions
            ii. Your reflections on what worked well for your project
            iii. You should include one example

5. Teamwork
        a. Discuss your approach for improving teamwork
            i. What tools did you adopt
                1. Discord
                2. Trello
            ii. What challenges did you encounter?
            iii. What did you do in response?
        b. Include an episode from the semester of a challenging/ conflictual situation, and how the team addressed this problem.

Presentation Notes:
- Go through criteria
- Timing starts when the person talks
- Make pictures readable
  - If theres text make it readable
  - For example, dont put the whole project brief or trello in a slide since the audience wont be able to read it
- Think about what to put on the slide
- Make use of empty space and mitigate use of clipart
  - Mentioned something about clipart is not the best idea
  - For Project Planning or Teamwork could add a "group" photo
- Packages used
  - Git
  - Surefire
  - Maven
  - Github Pages
  - SQL
- UI and colour scheme matters
- Technical details (For snailcat, group presenting)
  - Talk about platforms and decisions
  - DAO
  - Local database
  - Process Tracking
  - JavaFX
  - JavaTimeline
  - MVC
  - Packages split into functionality
  - Could probably add Unit Test
  - Find and present a technical decision?

- Quality assurance practices, mention it but go into more detail. How, when, what we did.
- Reflection
  - Critique process
  - What would we do differently?
- Show overview
  - How many must haves were completed from W9 to W13
  - What we had at W9 and what we had at W13
  - Did we clear all must haves?
- Reread script and keep an eye on the rubric
